

PakPrint

The PakPrint series was developed as a modern, high-intensity all-round ink series for a broad spectrum of applications in packaging printing. It is suitable for both straight and perfecting jobs. Thanks to its universal properties, the PakPrint series is furthermore an ideal choice for large company groups with different production locations and a variety of different printing presses. By enabling the use of just one ink type, it establishes essential prerequisites for constant print results.

The recipe for the mineral oil-free PakPrint inks is based on renewable raw materials. The inks are suitable for use with all absorbent substrates, and also permit the printing of picking-sensitive board grades thanks to a cutting-edge binder system. A minimal tendency to misting is conducive to use also on fastrunning presses.

Benefits:

- Excellent printability (ink/water balance, rolling properties)
- High intensity
- Very good rub resistance

Important:

As a modern ink series, PakPrint inks comply with all requirements of the ISO 2846-1 standard. Their intensity and dot sharpness enable the printer to satisfy all process demands of the ISO 12647-2 standard and at the same time to achieve a very neutral grey balance.

Properties:

Fast work and turn	4	5 = excellent
Fast finishing	4	4 = very good
Rub resistance	4	3 = good
Gloss	4	2 = satisfactory
Setting	medium	1 = sufficient
Suitable for perfecting	yes	
IR drying recommended	yes	
Duct fresh	yes	

	Article number	Light-fast	Transp.	Spirit	Nitro	Alkali	
PakPrint Yellow	P8331360	5	+	+	+	+	+ Property applicable
PakPrint Magenta	P8331350	5	+	+	+	-	- Property not applicable
PakPrint Cyan	P8331340	8	+	+	+	+	
PakPrint Black	P8331330	8	-	+	+	+	

This technical description is provided as information and general advice. Its contents represent our current knowledge. As specific applications are dependent on a diversity of factors beyond our control, however, we are unable to guarantee the success of printing in any particular case.
