

PrimePrint

The PrimePrint ink series was developed to satisfy the highest quality demands in respect of intensity, brilliance and rub resistance. It is destined for universal application thanks to a high level of printing contrast, low dot gain and good dampening solution tolerance.

PrimePrint inks are equally suitable for both straight and perfecting jobs and can be used with all absorbent substrates. Thanks to their specific properties, they are also ideal for use in alcohol-free offset processes.

Important:

As a modern ink series, PrimePrint inks comply with all requirements of the ISO 2846-1 standard. Their intensity and dot sharpness enable the printer to satisfy all process demands of the ISO 12647-2 standard and at the same time to achieve a very neutral grey balance.

Properties:

Fast work and turn	4	5 = excellent
Fast finishing	4	4 = very good
Rub resistance	5	3 = good
Gloss	5	2 = satisfactory
Setting	slow	1 = sufficient
Suitable for perfecting	yes	
Duct fresh	yes	

	Article number	Light-fast	Transp.	Spirit	Nitro	Alkali	
PrimePrint Yellow	P8331300	5	+	+	+	+	+ Property applicable
PrimePrint Magenta	P8331290	5	+	+	+	-	- Property not applicable
PrimePrint Cyan	P8331280	8	+	+	+	+	
PrimePrint Black	P8331270	8	-	-	-	+	

This technical description is provided as information and general advice. Its contents represent our current knowledge. As specific applications are dependent on a diversity of factors beyond our control, however, we are unable to guarantee the success of printing in any particular case.
